ABSTRACTED-PUB-NO: DE 19627344A

BASIC-ABSTRACT:

A composition (I) contains (-)-epicatechin, (-)-epigallocatechin, (-)-epicatechin-3-gallate, (-)-epigallocatechin-3-gallate, theaflavin(TF-1), theaflavin monogallate A (TF-2A), theaflavin monogallate B (TF-2B) and/or theaflavin digallate (TF-3), obtained by extraction from Camellia sinensis L. or by synthesis, in the form of a complete drug, drug components, extracts, individual components, derivatives and/or mixtures.

USE - (I) is useful for the prevention or treatment of oxidative stress, toxic effects due to radical chain reaction damage to biological structures, tumours and their earlier stages, metastasis, radical damage in cytostatic chemotherapy, radical damage radiation therapy or chemotherapy, humoral or cellular immunity diseases (including autoimmune diseases, HIV and AIDS), inhibition of reverse transcriptase of HIV-1 and other HIV types, inflammatory diseases of all types, liver disease, infections

(including infection with bacteria, virus, protozoa, virion, prion), arteriosclerosis, lipid metabolism disorders, hyperglycaemia, hypertension, diarrhoea and hypercholesterolaemia; as supportive therapy in weight reduction (medical or cosmetic); for reduction of high serum triglycerides; for improvement of atherogenic index in patients at cardiovascular risk factors; to improve the antioxidant status of patients with renal insufficiency, especially in haemodialysis patients; for the prophylaxis and delaying of premature ageing in all tissues in living conditions associated with premature ageing; and for the prophylaxis of caries (all claimed). The treatment is useful in rheumatic conditions and cancer.

Dosage is 300-1200 mg per day. Administration is oral, enteral, parenteral, rectal, external, intramuscular, subcutaneous, vaginal, sublingual, nasal, buccal, dermal, or intracutaneous.
